PROFESSIONAL SUMMARY

With twenty five years in the music and film and Television industries I have developed a multi skilled approach to my work. I am a capable sound operator and camera operator working in areas such as corporate production, television film and music. This has made me a useful asset on productions as I can adapt to situations and cover multiple roles especially when budgets are tight. I have an Operational Authorisation from the CAA to fly drones commercially and i am also familiar with editing in Premier, Adobe creative suites, Final Cut Pro and Avid Protools. In brief I would say I am a skilled video production professional able to set up and operate most equipment, edit final videos as well as create titling, animations and effects.

Recently I have been working with Absolute High Speed learning to use the Phantom Flex 4K camera to create incredible slow motion work.

I love working in teams and incorporating producer/director feedback, working closely with marketing and creative departments to achieve brand compliant results.

Recent work has been with DAZN television as an editor and content creator, Happy Hour Productions as Camera and Sound Op, SpeedWagon Productions as Camera & Sound Op. As well as a variety of corporate jobs for companies such as Avon Protection, Marks & Spencer and Creative Technology.

I am well-organised with a disciplined approach with good time management skills. Enthusiastic about developing and realizing a cohesive vision with each project. Full UK Driving Licence with VW transporter van.

I own my much of my own equipment including:

- Canon C70, Sony Fx6 with RF and G Master Lenses
- DJI Ronin S Gimbal
- DJi Inspire 2, Mavic Pro 2, Mavic Mini sub 250 grams
- Sound Devices sound recorders
- Avid Protools Ultimate HD
- FCPX & Priemier
- DPA Lav Mic/Radio mics, DPA 4017 Boom , Rode Video Mics
- Lectrosonics Hop
